Project title: Here for you

Academic Year: 2022/2023

Group Members: Osama Ibrahim Mohammad Ismail

Department Name: Computer engineering

Mohammad Ayman Ahmad Jury

Project Type                Software

Supervisor Name: Dr. Mona Demaidi

**Format:**

- ➢ Single space, Times New Roman.
- ➢ 12 pt,
- ➢ Maximum 1 page.

**Abstract Body:**

**Items must be provided in the Abstract:**

- ➢ Why do you think this project is important?  Please explain the significance of this

   Project in brief.

- ➢ In your point of view what are the important aspects that should be covered in the project?
- ➢ Objective(s): In your view, please explain the main objectives of the project.
- ➢ Methodology:  Give a brief outline of the application development process.
- ➢ Had this project been done before? Are there any similar applications available today?
- ➢
- ➢ **Note:** Please deliver this abstract early to ensure that your Project has been approved by the department's projects committee. **Registration will not be done without this approval.**

## Project's Abstract:

The world is developing rapidly in many areas nowadays. Especially in the technology field. One of those areas where technology is developed and used is" apps in medicine field". Clinic apps are examples of work facilitation in the field of medicine. Across the world, many Clinics use technology to organize their reservations, and manage them. On the other hand, that is not the case locally. Most Palestinian hospitals and clinics have not yet introduced technology to organize their hospitals and clinics in the required manner, which is available globally, unfortunately, those systems are old and not that practical. So, to keep pace with this development, local clinics should use more technology. Facilitating the management of reservations for the clinics, and making their life a little bit easier.

"Here for you" is a system for a clinic to manage its reservations and monitor them. Easing the supervision of the whole system by providing subsystems to manage the reservations for many services by using an App and website to organize them. as well as the app provides service for old people to send a doctor to their home by previous reservation. Chatbot is important as well in order to answer all the common questions! As well as a consultation with a specific doctor by calling him. Also, provide a service to pin your location for the clinic in case of any reservation at home. Users can edit their profiles. Regarding the communication between clinic and patients, there will be independent communication by chatting. System provides pages to fill information about the patients. System provides a way to upload documents from admin and users. Finally, the patients can rate the doctor as specifically or the clinic as generally.
